Superior Underfoot Comfort

Non-conductive Thermoplastic Urethane (TPU) outsole

ASTM F2913-11 Coefficient of Friction - Forward Flat Slip

for superior wear properties. Heat resistant to 266°F.

The Steel Blue Trisole® Comfort Technology system is a

patented three density soling system that offers a high level

of comfort, shock absorbency and energy return. The system

uses PORON® as energy absorbing pads under the pressure

withstand the application of 18,000 V at 60 Hz for a period of 1

minute with no current flow or leakage in excess of 1.0 mA in

dry laboratory conditions. This footwear is not suitable where

protective personal equipment. It is to be used in conjunction

with primary protective equipment in areas and environments

where there is a need to reduce the risk of electric shock due

points of the foot to give the wearer superior comfort and

offers similar shock absorbency and comfort to sports

Footwear marked as EH has been tested and shown to

EH Series footwear is intended for use as secondary

to accidental contact with live electric wires.

Description

8-inch lace-up boot with padded collar and tongue.

Upper Materials

Premium full-grain cowhide water resistant leather upper and double stitched in nylon thread. Non-corrosive lacing.

Toe Cap

Ergo-Defender[™] wide profile steel toe box. ASTM F2413-11 M I/75 C/75 EH.

Lining Materials

This boot is lined with Baltico[®], which is a soft, non-abrasive, hydrophobic material that wicks perspiration away from the foot, enabling the skin to remain cool and dry.

Full Innersole

A full length footbed that is inserted into the footwear to offer additional support and comfort. This footbed is made from soft polyurethane that will retain its shape and thickness throughout the life of the boot.

Insole

Heavy-duty, flexible anti-bacterial non-woven insole.

Midsole

Directly moulded Polyurethane midsole for greater shock absorption.
